The Arnold Soforenko Award for Extraordinary

Contributions to the Urban Forest

SWA has been working with Stanford University for over 30 years on over 300 projects to reclaim the 100-year old vision of Leland Stanford and Frederick Law Olmsted through a series of campus improvement projects. Integrating the university's facilities needs with a long-term landscape vision, the projects recover the campus's historic axes, open space patterns and juxtaposition of formal landscape spaces with naturalistic landscapes within the central campus. Working with the Stanford Management Company, SWA also provided planning, approval processing, and landscape services for the Sand Hill Road Corridor projects including Stanford West Senior Housing (now Vi Living), Stanford West Apartments, expansion of the Stanford Shopping Center, the Rosewood Sand Hill Hotel and Office development and extension of Sand Hill Road, a major roadway linking the university to the freeway system.
