

UCLA Northwest Campus Redevelopment Master Plan

In conjunction with Pfeiffer Partners Architects, SWA provided master planning of the entire northwest quadrant of the campus and landscape architectural services including the redesign and construction of undergraduate housing with an additional 2000 beds, a 248-car parking structure and associated academic, recreational and student programming facilities designed to integrate with the residential living experience, and provide an environment with a rich combination of spaces and activities that foster the vitality in on-campus residential life.
