

UPTOWN HOUSTON PEDESTRIAN MOBILITY

SWA is leading the design effort that will transform 10 miles of Uptown Houston streets into walkable environments. Improvements will create widened sidewalks, accessibility for all, shade-producing street trees, and a district-wide pedestrian lighting system.

LOCATION

Houston, Texas

CLIENT

Uptown Development Authority

SUB-CONSULTANTS

Hunt & Hunt Engineering Corp.
Mary Goldsby Associates

PROJECT TYPE/SCOPE OF WORK

Design

DATE BEGUN

Design: February 2009

Construction: August 2009

DATE OF COMPLETION (EST.)

Design: June 2009

Construction: 2013

THE BIG IDEA

Improved district-wide walkability

SPECIAL GREEN/LEED DE- SIGN

Promoting walking as a viable alternative to intra-district driving reduces VMT & traffic congestion, improves air quality, and promotes urban living.
