

Marsa Dubai Infinity Tower

Location
Dubai, United Arab Emirates
Client
Skidmore, Owings & Merrill LLP
SWA Scope
Landscape design services
Size
110,000 sm
Architect
Skidmore, Owings & Merrill LLP

The Infinity Tower project consists of new 73-story residential tower of approximately 110,000 sm in gross area to be constructed on the 10B Emaar District Dubai Marina site in Dubai, UAE. SWA is providing landscape design services for the roof garden and the main lobby entrance. The design applies a singular approach to solve multiple program requirements in a limited site area. Landscape design elements such as paving and fence patterns are derived from the building architectural language. A simple, continuous wood deck connects all program areas. The sun deck transforms from a flat surface to undulating sloped planes with raised deck areas strategically sloped to maximize views and providing soil depth for tree planting.
