

UCLA Hilgard Avenue Graduate Housing

As part of a multidisciplinary team SWA provided full landscape architectural services for the redevelopment and design of new graduate housing buildings at 720 & 824 Hilgard Avenue. Redevelopment of the sites will provide additional affordable housing for single graduate students which is in short supply given the low vacancy rates and high rents in West Los Angeles. The Hilgard properties, located close to university research laboratories, libraries, classrooms and medical center facilities, offer affordability, proximity and convenience to the UCLA student resident population. The project has received LEED Silver certification.
