Gomez, Vasquez, Aldana

**Awards**

2014 - Travel + Leisure Top Hotels and  
Resorts in Mexico

SWA provided landscape design and planting plans for all site landscaping for this 450-room, five-star hotel, including hardscape and softscape elements. The landscape concept is based on the creation of different environments through the use of appropriate plants and other indigenous materials to form a series of settings which are integrated into a larger composition. The project features a series of covered fountain courts from which the guests can enjoy views of the gardens and pools.
