

# Alphaville Lagoa dos Ingleses

Alphaville Lagoa dos Ingleses is a new community with residential, commercial, resort and public amenity uses. SWA's master plan began with a complete environmental evaluation of the 3,200-hectare site which includes a large lake set among gently rolling hills. The design incorporates a central urban area that terminates at a lakefront park, a multifamily area that overlooks the Minas Tennis Nautico Clube as well as the town center and lake, a hotel site, single-family communities and an area for the future development of a university. The overall site is connected by a series of greenways, trails and shoreline parks.
